Dear Mr. President,

Thank you for initiating the investigation into the Center for Disease Control (CDC) claim that vaccinations are safe and do not cause autism.

As a citizen of the United States, I urge you to continue to investigate the CDC even though you have appointed Scott Gottlieb as the head of the Food and Drug Administration (FDA) who lied when he stated, “any theories of a link between vaccines and autism have been ‘thoroughly debunked’” and Dr. Brenda Fitzgerald who also lied when she stated, “I’ve heard all the arguments against vaccination. All have been debunked”.

The only thing worse than fake news is fake science. Autism is an epidemic in this country, and we the people are sick and tired of being lied to so people in high positions can get rich while they destroy our children and grand children’s health. We have undeniable proof that vaccines cause autism.

Mr. President, it’s time to address this issue.

Sincerely,
