

TRUMP AND THE "DEEP STATE"

<https://twitter.com/@ironstowe>

1. Trump's connections to big money, oil and shady deals is far more sinister than usual.
2. Trump's campaign is also the first ever to be under criminal investigation by The FBI for the many many Russian ties to all involved.
3. The 'Deep State' expression is used by Trumpsters to try and create a narrative that it's a war between old establishment and the outsider.
4. Trump has fully played this game all along, most notably, by attacking NATO, trade deals, and the "drain the swamp" mantra.
5. As I have explained earlier, the drain the swamp mantra means both this and he is also following the Alexander Dugin playbook.

6. There has been many opinions of the meaning of the Deep State, and they all lead back to Big Money.
7. There is a strong resentment especially in the RWNJ part of the GOP of the traditional Big Money.
8. And those in the RWNJ have begun to use their vast resources against the Traditionalists, creating a shadow reality so to speak.

9. The past 8 years of DC infighting, obstruction by the GOP against President Obama's agenda, has also fueled this.

10. The anger from the Public on the Government willingness to do massive bailouts of the banks and auto industry, has further caused division.

11. Ironically enough (since the ACA battle recently) The American Tea Party (which was started in 1996) began to use America Firsters and New World.

12 .In 2016 Trump made that one of his slogans "America First" and combine that with Richard Nixon's silent majority strategy of 1968.

13. It was clear after the election, that Trump in his transition team had "surrounded himself" with people tied to the Kochs.

14. Education Secretary Betsy DeVos, was another major billionaire contributor to the Koch donor list.

15 CIA Director is Mike Pompeo, who was so closely entwined with the Koch brothers that he was known as the 'congressman from Koch'.

16. SEC Chairman Jay Clayton, who in the past has represented Goldman Sachs and other big banks in Wall street superdeals and a Koch protege.

17. Stephen K. Bannon, a former Goldman Sachs banker who moved on to become a Tea Party coordinator and executive director at Breitbart News.

18.As his campaign grew, he reached out to Wall Street financing, notably from Robert Mercer, of hedge fund Renaissance Technologies.

19. He also named Finance Chairman Steve Mnuchin, formerly of Skull and Bones and Goldman Sachs.

20. Mnuchin later became Trump's Treasury Secretary, the third former Goldman Sachs executive to lead Treasury in the last four administrations.

21. Trump named Gary Cohn, former president of Goldman Sachs, as his chief economic advisor and Director of the National Economic Council.

22. Trump did not challenge but preserved the status quo. Goldman Sachs, JPMorgan Chase, Citigroup, Morgan Stanley. The Wall Street-Washington complex, thus remained in control over the US Economy.

23 Deep State according to Wikipedia is a state within a state, which authors suspect exerts influence and control over public policy,

24a. the mainstream media, national security officials, and Silicon Valley.

25. 2 essential components to the deep state. On the one hand is big money. On the other are agencies like CIA, Pentagon et al.

26. Deep State is a system composed of high-level elements within the IC, military, security, judiciary, and organized crime.
